

INTRODUCTION

MozCoats is the result of driving Mozambique expertise and commitment into a 75% Mozambique indigenous owned coating contractor servicing the oil, LNG and industrial markets within Mozambique.

From its beginnings in 2021, MozCoats has provided a platform of supplying competent and credible inspectors, applicators and sand blast personnel with substantial experience within the industry.

Headquartered in Maputo, and operating from sites in Matola and Inhambane, MozCoats has taken the strategic decision of incorporating its Inhambane offices in Vilanculos order to service the increasing opportunity for providing a variety of coating applications for the growing number of oil and gas projects in the area.

OUR COMMITMENT

Our business is to give you the very best that we've got. Clients expect us to know our craft inside and out. As buyers ourselves, we are as tough on our suppliers as we expect you to be on us. The responsibility for good contracts and good work starts with MozCoats and we'd like to show you that we are up to the task.

We can absolutely do the job right...every time in accordance with our clients' requirements.

OUR TEAM

Our team is made up of Mozambican nationals only, and is highly experienced with abrasive blast cleaning and various types of corrosion protection applications with a combined experience spanning well over 20 years.

SERVICES OF ERED

MozCoats offers a full range of services, encompassing all aspects of the process.

This includes:

- Abrasive blasting
- Coating applications
- Pipeline corrosion protection
- Supervision and Inspection services
- Coating inspections
- Documentation
- Training services
 - Train the painter courses

EMPOWERMENT

We have partnered with Corrodere Academy international Train the Painter program. This allows us to uplift and provide local communities with proper training within the corrosion control industry, while we are servicing our clients.

Our continuous commitment to training in the areas where we operate, provide a solid platform for our employees to excel within the corrosion control industry and achieve internationally recognized certification.
